

Water Quality and Dechlorination Support

Natural Water Safening | Chlorine Removal & Protection

NeutralChlor is commonly used to prepare spray water for biological products and improve compatibility in fertilizer and input applications.

Product Information

NeutralChlor is a Natural Water Conditioning Solution Designed to:

- Remove chlorine and chloramine
- Create a safer environment for fertilizers, biological products, and plant applications.
- Act quickly
- Mix easily
- Improve water quality
- Supporting overall soil and plant performance.

Why GrainRx:

A lot of fertility programs focus on what gets applied — but not always on how efficiently the crop actually uses it. That's where GrainRx fits in. What we're helping growers do right now:

- Increase nutrient availability and uptake by supporting live biologicals
- Improve nutrient efficiency and reduces loss
- Build stronger root systems for better early vigor
- Help crops handle multiple types stress from weather, temperature and field conditions
- Unlock nutrients already tied up in the soil

GrainRx is built to work with your current fertility program — not replace it — so you can get more performance out of the dollars you're already spending.

Refer to the product label for complete application rates, mixing instructions, and use guidelines. Important: Always read and follow label directions. This product should be used only as directed. The distributor makes no warranties, expressed or implied, regarding the use of this product inconsistent with label instructions and assumes no liability for improper handling, storage, or application. Keep out of reach of children.
