

Multi-Mode Stress Buffer to Supports Plant Defense and Performance

BioBeneFix is a beneficial multi-mode biological consortium designed for:

- Biological protection: including well-known biological control genera (Trichoderma for soilborne disease pressure; entomopathogenic fungi; nematode antagonists).
- Stress-buffering when weather swings (biotic/abiotic stress response with a Trichoderma-based system)
- Nutrient availability: supports soil nutrient cycling and K mobilization
- Root & plant performance: supports early-season vigor and root-zone function.

How it's different:

Many biologicals are single-lane (only N, only a biostimulant, only a soil activator).

BioBeneFix is multi-lane: nutrient cycling + root vigor + biocontrol functional groups in one tool.

Product Information

Why it matters:

When margins are tight, the easiest bushels to lose are the ones you never see—nutrients tied up in soil, early root setbacks, and stress that quietly reduces yield. BioBeneFix helps your crop use more of what's already in your program while adding biology to support resilience.

What BioBeneFix helps you do

- **Unlock and mobilize nutrition** (supports nutrient cycling and K availability)
- **Build a stronger root-zone engine** for uptake and consistency
- **Support plant defense and performance under stress** (Trichoderma-linked mechanisms are widely documented)

Why GrainRx:

A lot of fertility programs focus on what gets applied — but not always on how efficiently the crop actually uses it. That's where GrainRx fits in. What we're helping growers do right now:

- Increase nutrient availability and uptake by supporting live biologicals
- Improve nutrient efficiency and reduces loss
- Build stronger root systems for better early vigor
- Help crops handle multiple types stress from weather, temperature and field conditions
- Unlock nutrients already tied up in the soil

GrainRx is built to work with your current fertility program — not replace it — so you can get more performance out of the dollars you're already spending.

Refer to the product label for complete application rates, mixing instructions, and use guidelines.
Important: Always read and follow label directions. This product should be used only as directed. The distributor makes no warranties, expressed or implied, regarding the use of this product inconsistent with label instructions and assumes no liability for improper handling, storage, or application. Keep out of reach of children.
