

## Nutrient Cycling Through Residue Breakdown

**BioResiFix is a multi-functional, multi-organism consortium designed to:**

- Accelerate residue breakdown & nutrient mineralization
- Improve nutrient availability & uptake (N, P, K + micros)
- Boost root function + stress tolerance via PGPR + mycorrhizae
- Stabilize the rhizosphere for more consistent performance across variable soils
- Increases fertilizer program efficiency and return on investment

**Why is this important? In today's ag economy, efficiency in nutrient management is more important than ever. BioResiFix in conjunction with a fertilizer program is designed to boost that efficiency.**

### Product Information

### BioResiFix gives 4 things in one pass:

**BioResiFix breaks down residue to unlock nutrients, improve efficiency, and build stronger, more resilient crops.**

- Break down residue → release nutrients
- Unlock tied-up P & K
- Improve nitrogen efficiency
- Build a bigger, more resilient root system

## Why GrainRx:

**A lot of fertility programs focus on what gets applied — but not always on how efficiently the crop actually uses it. That's where GrainRx fits in. What we're helping growers do right now:**

- Increase nutrient availability and uptake by supporting live biologicals
- Improve nutrient efficiency and reduces loss
- Build stronger root systems for better early vigor
- Help crops handle multiple types stress from weather, temperature and field conditions
- Unlock nutrients already tied up in the soil

**GrainRx is built to work with your current fertility program — not replace it — so you can get more performance out of the dollars you're already spending.**

**Refer to the product label for complete application rates, mixing instructions, and use guidelines.**  
Important: Always read and follow label directions. This product should be used only as directed. The distributor makes no warranties, expressed or implied, regarding the use of this product inconsistent with label instructions and assumes no liability for improper handling, storage, or application. Keep out of reach of children.
